#### **Projects**

# alcohol detector with engine locking system using GSM and GPS technology:

The "Development Of Alcohol Detection System With Engine Locking Using GSM And GPS Technology" is a project aimed at designing a System that can detect the presence of alcohol in a driver's breath and Prevent them from starting their vehicle. The system is also equipped with GSM and GPS technology, which enables the authorities to receive real-time updates on the location of the vehicle and take necessary action if required

#### N-Queens Puzzle game

N-Queens Puzzle Game, developed in Java swing, challenges Players to strategically place queens on a resizable chessboard. With Limited chances, the interactive interface promotes stategic thinking. This project illustrates Java's versatility in creating engaging graphical user interfaces for educational games within a compact framework.

# · Appointment Schedule system

The Appointment Scheduling System is a console-based application designed to manage client appointments efficiently. It includes features for user authentication, client management, and appointment scheduling. Users can log in, add clients, schedule appointments, view existing appointments, update details, and cancel appointments. The system prioritizes a smooth user experience with robust error handling and a clear, user-friendly interface management.

## **Interests**

- Dancing
- Playing chess
