Objective

Motivated and adaptable engineering graduate (CGPA: 8.68) with hands-on experience in Java, Python, and web development. Seeking a dynamic role to apply my technical skills and contribute to impactful software solutions.

Experience

- Accenture** Feb 2025 - June 2025
Packaged app development associate (intern)
Developed enterprise-level applications using Java, python, Streamlit & Hugging Face. Applied OOP principles, design patterns, and frameworks in real-world projects.
- Code Alpha** Jun 2023 - Jun2023
Web development intern
Delivered responsive landing pages, file converter tools, and CSS background generators.

Education

- SR University** 2022 - 2025
B. Tech (Electronic and Communications and Engineering)
8.68
- VMR politechnic** 2019 - 2022
Diploma (Electronic and Communications and Engineering)
8.1
- Sujata vidyaniketan digi High School** 2019
SSC
9.5

Skills

- Languages: Python, Java, HTML, CSS, JavaScript
- Tools/Tech: Streamlit, Hugging Face, Git, Vscode, Azure
- Concepts: OOP, Design Patterns, Data Structures & Algorithms

Projects

- Hotel Application project.**
Developed a command-line application for hotel room reservations using Java. Integrated real-time room availability checks, user/admin roles, and date validation using SimpleDateFormat. Implemented Singleton and Factory patterns with Lists, Streams, and in-memory data storage. Designed for a smooth user experience, it even suggests alternate dates when rooms are unavailable.
- Appointment Schedule system**
Built a robust console-based system for managing client appointments. Features include user authentication, client registration, scheduling, updating, and cancellation with real-time feedback. Implemented strong error handling and modular OOP design for better code maintainability and extensibility.
- N-Queens Puzzle game**
Created an interactive puzzle game where players strategically place N queens on a resizable chessboard. Built using Java Swing, it features a dynamic GUI, limited moves system, and highlights invalid placements to enhance logic-building skills. Showcases Java's GUI and game logic capabilities.
- alcohol detector with engine locking system using GSM and GPS technology:**
Engineered a prototype system that detects alcohol in a driver's breath using sensors and blocks the ignition if alcohol is detected. Integrated GSM and GPS modules for real-time vehicle tracking and alerting authorities. This system promotes road safety by preventing drunk driving and enabling location monitoring.

Interests

- Playing chess

Languages

- English
- Telugu
- Hindi

Strengths

- Adaptability
- Time management

Soft Skills

- Communication skills
- Problem solving
- Quick learner
